Geological Society of America Bulletin

Volume 94

Contents

JANUARY

2 Comments

3–14 Cenozoic normal faulting and the shallow struc- of the Rio Grande rift near Socorro, New Mexico . . . . *Cheryl D. Cape, Susan McGeary, and George A. Thompson*

15–29 Ultramafic intrusions in the Lewis Hills Massif, Bay of Islands Ophiolite Complex, Newfoundland: Implications for igneous processes at oceanic fracture zones . . . . *Jeffrey A. Karson, Donald L. Elthon, and Stephen E. DeLong*

30–42 Cretaceous deformation in the western foothills of the Sierra Nevada, California . . . . *Paul C. Bateman, Alan J. Busacca, and Wayne N. Sawka*

43–57 Lead-isotopic compositions of diverse igneous rocks and ore deposits from southwestern New Mexico and their implications for early Proterozoic crustal evolution in the western United States . . . . *John S. Stacey and David C. Hedlund*

58–79 An evaluation of exploration methods for low-temperature geothermal systems in the Artesian City area, Idaho . . . . *Eric M. Struhsacker, Christian Smith, and Regina M. Capuano*

80–91 Geological controls on the topological properties of some trellis channel networks . . . . *Athol D. Abrahams and Jean-Jacques Flint*

92–116 Structure of the accretionary complex of Barbados, I: Chalky Mount . . . . *R. C. Speed*

117–133 Large-scale bed configurations (macroforms), Platte River Basin, Colorado and Nebraska: Primary structures and formative processes . . . . *K. D. Crowley*

134–150 The Sistan suture zone of eastern Iran . . . . *R. Tirrul, I. R. Bell, R. J. Griffis, and V. E. Camp*

151–158 Magnetic and gravity evidence for a subsurface connection between the Palisades sill and the Ladentown basalts . . . . *Kenneth P. Kodama*

FEBRUARY

160 Comments

161–180 Metabasalts, axial hot springs, and the structure of hydrothermal systems at mid-ocean ridges . . . . *Michael J. Mottl*

181–191 Eocene magnetic stratigraphy at Gubbio, Italy, and its implications for Paleogene geochronology . . . . *Giovanni Napoleone, Isabella Premoli Silva, Friedrich Heller, Paolo Cheli, Siro Corezzi, and Alfred G. Fischer*

192–205 Geology, structure, and tectonics of the Pajarito fault zone in the Española basin of the Rio Grande rift, New Mexico . . . . *Matthew P. Golombek*

206–221 Pre-Keweenawan anorthosite inclusions in the Keweenawan Beaver Bay and Duluth Complexes, northeastern Minnesota . . . . *D. A. Morrison, L. D. Ashwal, W. C. Phinney, Chi-Yu Shih, and J. L. Wooden*

222–235 Provenance of North American Phanerozoic sandstones in relation to tectonic setting . . . . *William R. Dickinson, L. Sue Beard, G. Robert Brakenridge, James L. Erjavec, Robert C. Ferguson, Kerry F. Inman, Rex A. Knepp, F. Alan Lindberg and Paul T. Ryberg*

236–252 The ophiolitic North Fork terrane in the Salmon River region, central Klamath Mountains, California . . . . *Clifford J. Ando, William P. Irwin, David L. Jones, and Jason B. Saleeby*

253–258 Fission-track ages of the Chagai Intrusives, Baluchistan, Pakistan . . . . *Lynne L. Breitzman, Richard W. Birnie, and Gary D. Johnson*

259–273 Tectonic and geologic implications of the Zodiac fan, Aleutian Abyssal Plain, northeast Pacific . . . . *Andrew J. Stevenson, David W. Scholl, and Tracy L. Vallier*

274–291 Sources of shape variation in lunar impact craters: Fourier shape analysis . . . . *Duane T. Eppler, Robert Ehrlich, Dag Nummedal, and Peter H. Schultz*

292–304 Late Miocene and early Pliocene basaltic rocks and their implications for crustal structure, northeastern California and south-central Oregon . . . . *Edwin H. McKee, Wendell A. Duffield, and Robert J. Stern*

305–311 Seismic response of major regional unconformities in Atlantic Coastal Plain sediments at Smith Point, Virginia . . . . *P. S. Dysart, C. Coruh, and J. K. Costain*

305–311 Seismic response of major regional unconformities in Atlantic Coastal Plain sediments at Smith Point, Virginia . . . . *P. S. Dysart, C. Coruh, and J. K. Costain*

MARCH

312 Comments

313–324 Bolides and biostratigraphy . . . . *Digby J. McLaren*

325–340 Origin of Precambrian iron-formations in the Lake Superior region . . . . *Milford S. Lougheed*

341–361 Andean tectonics related to geometry of subducted Nazca plate . . . . *Teresa E. Jordan, Bryan L. Isacks, Richard W. Allmendinger, Jon A. Brewer, Victor A. Ramos, and Clifford J. Ando*

362–380 Structure and emplacement of a rhyolitic obsidian flow: Little Glass Mountain, Medicine Lake Highland, northern California . . . . *Jonathan H. Fink*

381–395 Sedimentation processes in the Northwest Pacific Basin revealed by echo-character mapping studies . . . . *John E. Damuth, Robert D. Jacobi, and Dennis E. Hayes*

396–412 On the mechanisms and kinetics of oxygen isotope exchange in quartz and feldspars at elevated temperatures and pressures . . . . *Alan Matthews, Julian R. Goldsmith, and Robert N. Clayton*

413–422 Stratigraphy of upper Paleozoic volcanic rocks and regional unconformities in part of the northern Sierra terrane, California . . . . *David S. Harwood*

423 Medals and Awards for 1982

APRIL

436 Comments

437–450 Evidence for two pulses of glaciation during the late Proterozoic in northern Utah and southeastern Idaho . . . . *Max D. Crittenden, Jr., Nicholas Christie-Blick, and Paul Karl Link*

451–458 Late Paleozoic high-pressure metamorphic rocks in northwestern Washington and southwestern British Columbia: The Vedder Complex . . . . *R. L. Armstrong, J. E. Harakal, E. H. Brown, M. L. Bernardi, and P. M. Rady*

459–470 Facies, topography, and sedimentary processes in the Catskill Sea (Devonian), New York and Pennsylvania . . . . *Donald L. Woodrow and Ann M. Isley*

471–498 Metamorphism and plutonism in the central part of the Okanogan Range, Washington . . . . *Fred J. Menzer, Jr.*

499–505 Computer simulation of rock-glacier development under viscous and pseudoplastic flow . . . . *Greg A. Olyphant*

506–518 The role of woody vegetation in stabilizing slopes in the Cincinnati area, Ohio . . . . *Mary M. Riestenberg and Susan Sovonick-Dunford*

519–542 Stratigraphy and petrogenesis of the Grande Ronde Basalt from the deep canyon country of Washington, Oregon, and Idaho . . . . *S. P. Reidel*

543–548 The Morrowan-Atokan (Pennsylvanian) boundary problem . . . . Patrick K. Sutherland and Walter L. Manger

549–556 Digitally processed topographic data for regional tectonic evaluations . . . . *Robert A. Schowengerdt and Charles E. Glass*

557–559 Introduction: Symposium on industrial minerals of the upper Midwest: Discussion and reply.
Discussion . . . . *James J. Norton*
Reply . . . . *Donald D. Carr and Haydn H. Murray*

559–560 Controls of subduction geometry, location of magmatic arcs, and tectonics of arc and back-arc regions: Discussion . . . . *Michael A. Fisher*

MAY

562 Comments

563–575 Joint formation in granitic rock of the Sierra Nevada . . . . *Paul Segall and David D. Pollard*

576–589 Alluvial history of the Porcupine River, Alaska: Role of glacial-lake overflow from northwest Canada . . . . *Robert M. Thorson and E. James Dixon, Jr.*

590–613 Paleoceanographic implications of Miocene deep-sea hiatuses . . . . *Gerta Keller and John A. Barron*

614–629 Origin of the trachyte–quartz trachyte–peralkalic rhyolite suite of the Oligocene Paisano volcano, Trans-Pecos Texas . . . . *Don F. Parker*

630–639 Classification of sedimentary furrows and a model for furrow initiation and evolution . . . . *Roger D. Flood*

640–663 An $^{18}O/^{16}O$ and D/H study of Tertiary hydrothermal systems in the southern half of the Idaho batholith . . . . *R. E. Criss and H. P. Taylor, Jr.*

664–672 Experimental study of knickpoint and longitudinal profile evolution in cohesive, homogeneous material . . . . *Thomas W. Gardner*

673–678 Variables influencing water-surface slopes in gravel-bed streams at bankfull stage . . . . *Karen L. Prestegaard*

679–681 Precambrian evolution of Afro-Arabian crust from ocean arc to craton: Discussion . . . . *W. R. Church*

681–683 Misuse of the term "bentonite" for ash beds of Devonian age in the Appalachian basin: Discussion and reply.
Discussion . . . . *Warren D. Huff*
Reply . . . . *John B. Roen and John W. Hosterman*

684–686 Antler orogeny and foreland basin: A model: Discussion and reply.
Discussion . . . . *J. G. Johnson and Anne Pendergast*
Reply . . . . *R. C. Speed and N. H. Sleep*

JUNE

688 Comments

689–699 Composition and origin of the inorganic fraction of southern New Jersey coastal mud deposits . . . . *Joseph T. Kelley*

700–712 A model for carbonate to terrigenous clastic sequences . . . . *Kenneth R. Walker, Ganapathy Shanmugam, and Stephen C. Ruppel*

713–719 Nd and Sr isotopic study of crustal and mantle inclusions from the Sierra Nevada and implications for batholith petrogenesis . . . . *Michael A. Domenick, Ronald W. Kistler, F.C.W. Dodge, and Mitsunobu Tatsumoto*

720–729 Asymmetrical distribution of Quaternary alluvial fills, Pumpkin Creek drainage basin, western Nebraska . . . . *R. F. Diffendal, Jr., and R. George Corner*

730–738 Eolian deposition in the northeast Pacific Ocean: Cenozoic history of atmospheric circulation . . . . *Thomas R. Janecek and David K. Rea*

739–752 Channel changes in badlands . . . . *Alan D. Howard and Gordon Kerby*

753–767 Structural geology of the Pelona Schist and Vincent thrust, San Gabriel Mountains, California . . . . *Carl E. Jacobson*

768–790 Tin granites of Seward Peninsula, Alaska . . . . *Travis Hudson and J. G. Arth*

791–797 Late Quaternary marine stratigraphy southeast of New Zealand . . . . *Gary B. Griggs, Lionel Carter, James P. Kennett, and Robert V. Carter*

798–812 The Oligocene-Miocene boundary in the South Pacific . . . . *M. S. Srinivasan and J. P. Kennett*

JULY

814 Comments

815–822 A paleomagnetic study of Piedmont metamorphic rocks in northern Delaware . . . . *Peter M. Brown and Rob Van Der Voo*

823–840 A paleopedological approach to the interpretation of terrestrial sedimentary rocks: The mid-Tertiary fossil soils of Badlands National Park, South Dakota . . . . *Greg J. Retallack*

841–854 Sources and dispersal patterns of clay minerals in surface sediments from the continental-shelf areas off Alaska . . . . *A. S. Naidu and T. C. Mowatt*

855–874 Petrology of the Chunky Gal Mountain mafic-ultramafic complex, North Carolina . . . . *M. Stuart McElhaney and Harry Y. McSween, Jr.*

875–888 Correlation and provenance of upper Mesozoic chert-rich conglomerate of California . . . . *Victor M. Seiders*

889–906 The Notch Peak Contact Metamorphic Aureole, Utah: Petrology of the Big Horse Limestone Member of the Orr Formation . . . . *V. C. Hover Granath, J. J. Papike, and T. C. Labotka*

907–925 The Walvis Ridge transect, Deep Sea Drilling Project Leg 74: The geologic evolution of an oceanic plateau in the south Atlantic Ocean . . . . *Theodore C. Moore, Jr., Philip D. Rabinowitz, Anne Boersma, Peter E. Borella, Alan D. Chave, Gerard Duee, Dieter K. Futterer, Ming Jung Jiang, Klaus Kleinert, Andrew Lever, Helene Manivit, Suzanne O'Connell, Stephen H. Richardson, and Nicholas J. Shackleton*

926–935 Pseudotachylite from the Vredefort Ring, South Africa, and the origins of some lunar breccias . . . . *Elisabeth C. Schwarzman, Charles E. Meyer, and H. G. Wilshire*

936–938 Late Woodfordian and Greatlakean history of the Green Bay Lobe, Wisconsin: Discussion and reply.
Discussion . . . . *Robert F. Black*
Reply . . . . *David M. Mickelson and M. Carol McCartney*

AUGUST

940 Comments

941–966 The evolution of Middle America and the Gulf of Mexico–Caribbean Sea region during Mesozoic time . . . . *Thomas H. Anderson and Victor A. Schmidt*

967–985 Origin of the Torlesse terrane and coeval rocks, South Island, New Zealand . . . . *Thomas C. MacKinnon*

986–1004 Paleohydraulic reconstruction of flash-flood peaks from boulder deposits in the Colorado Front Range . . . . *John E. Costa*

1005–1019 Origin of bimodal volcanism, southern Basin and Range province, west-central Arizona . . . . *Neil H. Suneson and Ivo Lucchitta*

1020–1027 Reconnaissance geology of Amlia Island, Aleutian Islands, Alaska . . . . *Hugh McLean, James R. Hein, and Tracy L. Vallier*

1028–1031 Post–middle Miocene accretion of Franciscan rocks, northwestern California: Discussion and reply.
Discussion . . . . *S. G. Miller and K. R. Aalto*
Reply . . . . *R. J. McLaughlin*

1032 Paleoconvergence rates determined from K_2O/SiO_2 ratios in magmatic rocks and their application to Cretaceous and Tertiary tectonic patterns in southwestern North America: Discussion.
Discussion . . . . *Allen F. Glazner*

SEPTEMBER

1034 Comments

1035–1054 Channels and valleys on Mars . . . . *Mars Channel Working Group*

1055–1072 Implications of selected subsurface data on the structural form and evolution of some basins in the northern Basin and Range province, Nevada and Utah . . . . *R. Ernest Anderson, Mary Lou Zoback, and George A. Thompson*

1073–1080 Clastic dike swarms and the structural evolution of the foreland fold and thrust belt of the southern Andes . . . . *Margaret A. Winslow*

1081–1108 Adirondack Highlands–Northwest Lowlands "boundary": A multiply folded intrusive contact with fold-associated mylonitization . . . . *Richard W. Wiener*

1109–1116 The practicality of vertical cephalopod shells as paleobathymetric markers . . . . *Rex E. Crick*

1117–1126 Chemical and mineralogic variations within four dikes of the Columbia River Basalt Group, southeastern Columbia Plateau . . . . *M. E. Ross*

OCTOBER

1128 Comments

1129–1134 Porosity reduction by pressure solution: A theoretical model for quartz arenites . . . . *C. L. Angevine and D. L. Turcotte*

1135–1147 Correlation of metamorphosed Paleozoic strata of the southeastern Mojave Desert region, California and Arizona . . . . *Paul Stone, Keith A. Howard, and Warren Hamilton*

1148–1158 Stripping of Keanakakoi tephra on Kilauea Volcano, Hawaii . . . . *Michael C. Malin, Daniel Dzurisin, and Robert P. Sharp*

1159–1172 Petrology, chemistry, and isotopic composition of submarine volcanoes in the southern Mariana arc . . . . *T. H. Dixon and R. J. Stern*

1173–1184 Adirondack-Appalachian crustal structure: The COCORP Northeast Traverse . . . . *L. Brown, C. Ando, S. Klemperer, J. Oliver, S. Kaufman, B. Czuchra, T. Walsh, and Yngvar W. Isachsen*

1185–1198 Geometry and structural history of the Mesozoic thrust belt in the Goodsprings district, southern Spring Mountains, Nevada . . . . *Michael D. Carr*

1199–1214 Modal composition and detrital clinopyroxene geochemistry of lithic sandstones from the New England Fold Belt (east Australia): A Paleozoic forearc terrane . . . . *Peter A. Cawood*

1215–1224 Early Proterozoic metasediments from north-central Colorado: Metamorphism, provenance, and tectonic setting . . . . *Kent C. Condie and Charles Martell*

1225–1231 Entrainment of gravel from naturally sorted riverbed material . . . . *E. D. Andrews*

1232–1240 Plutonic rocks of Jurassic age in the Alaska–Aleutian Range batholith: Chemical variations and polarity . . . . *Bruce L. Reed, Alfred T. Miesch, and Marvin A. Lanphere*

1241–1244 Flow mélanges: Numerical modeling and geologic constraints on their origin in the Franciscan subduction complex, California: Discussion and reply.
Discussion . . . . *John M. Murphy and K. R. Aalto*
Reply . . . . *Mark Cloos*

1245–1251 Hummocky stratification: Significance of its variable bedding sequences: Discussion and reply.
Discussion . . . . *Roger G. Walker, William L. Duke, and Dale A. Leckie*
Reply . . . . *R. H. Dott, Jr., and Joanne Bourgeois*

NOVEMBER

1256 Comments

1257–1274 Stratigraphy and depositional setting of the Proterozoic Snowy Pass Supergroup, southeastern Wyoming: Record of an early Proterozoic Atlantic-type cratonic margin . . . . *Karl E. Karlstrom, Andrew J. Flurkey, and Robert S. Houston*

1275–1280 Rb-Sr provenance dates of feldspar in glacial deposits of the Wisconsin Range, Transantarctic Mountains . . . . *G. Faure, K. S. Taylor, and J. H. Mercer*

1281–1288 An evaluation of criteria to deduce the sense of movement in sheared rocks . . . . *Carol Simpson and Stefan M. Schmid*

1289–1307 Geologic evolution of Hess Rise, central North Pacific Ocean . . . . *Tracy L. Vallier, Walter E. Dean, David K. Rea, and Jörn Thiede*

1308–1318 Till stratigraphy in the St. Lawrence Valley near Malone, New York: Revised glacial history and stratigraphic nomenclature . . . . *Peter Clark and P. F. Karrow*

1319–1328 Paleomagnetism of the Lower Devonian Traveler Felsite and the Acadian orogeny in the New England Appalachians . . . . *Dann J. Spariosu and Dennis V. Kent*

1329–1344 Pre-Cretaceous crystalline rocks of the western Chugach Mountains, Alaska: Nature of the basement of the Jurassic Peninsular terrane . . . . *Terry L. Pavlis*

1345–1358 Disconformities and paleoceanography in the southeast Indian Ocean during the past 5.4 million years . . . . *Noel I. Osborn, Paul F. Ciesielski, and Michael T. Ledbetter*

1359–1376 Structural geology of the Montgomery Mountains and the northern half of the Nopah and Resting Spring Ranges, Nevada and California . . . . *B. C. Burchfiel, G. C. Hamill IV, and D. E. Wilhelms*

1377–1379 Linesmanship and the practice of linear geo-art: Discussion and reply.
Discussion . . . . *Russell L. Wheeler*
Reply . . . . *Donald U. Wise*

DECEMBER

1380 Comments

1381–1400 Sedimentological and structural evolution of the Arabian continental margin in the Musandam Mountains and Dibba zone, United Arab Emirates . . . . *M. P. Searle, N. P. James, T. J. Calon, and J. D. Smewing*

1401–1414 Glacial characteristics of a Pleistocene ice lobe in east-central Minnesota . . . . *Stanley E. Chernicoff*

1415–1429 Process and rate of dedolomitization: Mass transfer and ^{14}C dating in a regional carbonate aquifer . . . . *William Back, Bruce B. Hanshaw, L. Niel Plummer, Perry H. Rahn, Craig T. Rightmire, and Meyer Rubin*

1430–1437 Two Cretaceous volcanic episodes in the western Pacific Ocean . . . . *David K. Rea and Tracy L. Vallier*

1438–1441 An obducted ophiolite complex in the Cordillera Central of the Dominican Republic . . . . *Peter Theyer*

1442–1449 Pre-Wisconsinan glacial stratigraphy, chronology, and paleomagnetics of west-central Wisconsin . . . . *Robert W. Baker, Jimmy F. Diehl, Thomas W. Simpson, Lucian W. Zelazny, and Suzanne Beske-Diehl*

1450–1465 Storm-controlled oblique dunes of the Oregon coast . . . . *Ralph E. Hunter, Bruce M. Richmond, and Tau Rho Alpha*

1466–1474 Petrography of the Paradise (No. 12), Baker (No. 13), and Coiltown (No. 14) coals of the lower portion of the Sturgis Formation (Pennsylvanian) in western Kentucky . . . . *Eric J. Trinkle, James C. Hower, and Garry D. Wild*

1475–1481 Coal metamorphism in the upper portion of the Pennsylvanian Sturgis Formation in western Kentucky . . . . *James C. Hower, Faith L. Fiene, Garry D. Wild, and Charles T. Helfrich*
